Email: Phone:

This application is to be completed for an entire adult dog that was MFCA recorded as a pup.

Instructions for completing this application *(see also Breeders Handbook)*

1. Please print all details clearly in block letters. No lines are to be left blank.
2. **All applications must be accompanied by at least three (3) colour photographs; photos must show the dog in a “square on” standing profile, left and right sides and front on. The photos must show all of the dog (including legs and feet).** The dog must be 100% of the photograph with no people, animals or objects in the background or foreground. If the dog’s feet are not clearly visible an additional photo of the feet is required. The photographs must be signed by the attesting veterinarian to identify the animal being recorded. These photographs will be retained permanently on the club’s Database.
3. The Health Declaration (page 3) attesting to the height, weight, bite, patellae, testes and microchip of the dog must be completed and signed by a veterinarian before this application can be processed. No entire dog will be MFCA certified for Adult Registration without a completed Health Declaration.
4. All Adult dogs must have their Primary Lens Luxation (PLL) status known for Adult Registration. If the status is not known you **must** supply Genetic Analysis Report showing testing results. If further details are required, please consult the Breeders Handbook or contact the Registrar.
5. The fee for Adult Registration is **\$25.00** and payment or payment details must accompany this form.

Declaration

I hereby apply for Adult Registration of this dog/bitch with the Mini Foxie Club of Australia Inc. (MFCA) and certify that the information provided is correct to the best of my knowledge.

Guidelines for the Veterinarian completing the MFCA Health Declaration

General Health Please indicate the general health of the dog/bitch.

Bite Please tick box to describe bite. The correct bite of a Miniature Fox Terrier is a scissor bite, not a level bite. Under "Comments" please qualify your answer if necessary to aid MFCA classifiers. Please indicate any specifics, such as "overbite is slight/severe"; "underbite is over 3mm"; "minor" "major"; "two upper incisors are slightly out of alignment, but jaw is normal"; etc

Testicles Please tick box to describe the external genitalia of a male.

Patellae The MFCA observes a scale of 0 to 4 for patella luxation.

Grade 0: Patella cannot be luxated.

Grade 1: Patella can be luxated manually and returns into position spontaneously.

Grade 2: Patella can be luxated manually and returns into position with manipulation.

Grade 3: Patella spontaneously luxates when the dog is standing.

Grade 4: Patella is permanently luxated.

If patella is not perfect but better than 1, a score of 0.5 (zero point five) may be given where the patella does not dislocate but there is a very slight looseness in the joint and the veterinarian is uncomfortable marking the patella as perfect. Under "Comments" please indicate specifics, such as "slight looseness in left knee, right knee perfect", "no clinical indications", etc.

Weight & Height Please weigh the dog and record weight on the Health Declaration. Please indicate if weight of animal is considered to be a healthy weight for the given height, or if it is overweight or underweight in your opinion. Height is measured from the withers to the floor. The height parameters of the Breed Standard for a Miniature Fox Terrier are 24cm - 30.5 cm (9 ½ - 12 inches). Please measure and record the height on the Health Declaration. Should the animal being examined not be within the parameters listed, your comments on the other listed features of the dog are still required.

Microchip Number Please verify/record the number of the implanted microchip.

Photographs The owner will present you with at least 3 photographs of the dog/bitch being examined. There should be no other dogs present in the photos.

Please write in the margin of the page on which the photograph is printed, e.g. "*This is Spot*"; "*This is a photo of Tiger Brown*"; "*This is a true photo of the dog/bitch known to this surgery as Foxiedowns Special Effect.*" etc, to confirm the identity of the dog you have examined. If margin space is insufficient, this can be stated on the back of the page. Please take care not to use a pen that bleeds, as the photos will be used for official registry records. Photographic prints can be signed on the back, taking care not to press too hard.

The Management Committee of the Mini Foxie Club of Australia thanks you in advance for your care in completing the Health Declaration.

If you have any questions, or wish to make any suggestions, please contact
